The PVS/7 is featherweight and mounts very comfortably on your head. The light weight significantly reduces operator fatigue compared to older heavier foreign models.

Image resolution is superb. The gen. 4 nightvision tube installed in the pvs 7 offers crystal clear super bright viewing.

Now available with the advanced PINNACLE thin film auto gated technology tube.

Currently used in Iraq by United States War fighters, The A/N (Army / Navy) PVS-7D generation 4 series Head mounted starlight night vision goggles are a US Military spec unit. Designed for the rigors of combat this is the unit used in many special operations by elite armed forces. SPI Provides the best AN/PVS-7D (delta) grade systems with clean flawless image intensifier tubes. Image resolution is superb. The gen. 4 night vision tube installed in the AN/PVS-7D offers crystal

clear super bright viewing. Auto gain control keeps you at the right level regardless of light sources in the field of view. The unit comes with a built in IR illuminator for map reading or close up work in zero ambient light situations. A special head harness is included in the delivery scope which leaves the hands free for other tasks. And because of the individual focusing of the eyepiece in terms of diopters, even user that wear glasses get a great perspective.
