

X25 Clip On Thermal Scope

The X25 is one of the most advanced Thermal imaging rifle scope systems for Security, surveillance, hunting and military applications. The X25 thermal imaging riflescope offers superior clarity, versatility, reliability, functionality and value. Based on the proven FLIR microbolometer core, the X25 thermal hunting scope is an ideal product for force protection, border patrol officers, police SWAT officers and special operations forces, providing users with the necessary tools to be successful in both daytime and nighttime field conditions.

Dual Purpose Thermal Scope

The X25 Thermal FLIR scope converts your existing day scope to thermal and provides excellent target acquisition and aiming capabilities for the demanding sports shooter, varmint hunter, military, law enforcement, or security personnel. The X25 Thermal imaging sight eliminates the traditional requirement of removing your existing day scope from your rifle, to replace it with a dedicated thermal sight (which would also involve re-zeroing). The X25 simply mounts in front of your own standard day optical sight. Factory bore-sighted to tolerances of less than 1 MOA, no re-zeroing is required. The X25 thermal imaging scope allows the user to maintain consistent eye relief and shooting position, and because the user views his own day scopes reticle (which he is familiar with), no re-training is required.

X25 Specifications

Detector	Uncooled microbolometer, shock/recoil resistant 17 Um
Optics	2x, Germanium/hardened
Video Format	NTSC/PAL
Display	OLED 640x480
Exit Pupil Diameter, mm	25
Focal Length of the Lens	42 mm
Objective Lens F stop	1:1
System Resolution, ang/sec	120
FOV	11 deg
Range of Focus	5 to infinity
Controls	digital / direct
Power Supply	2x CR123A 3V
Environmental Rating	Waterproof - 10m for 30 min
Operating Temperature	-50 to +70 °C
Storage Temperature	-40 to +50 °C
Dimensions	202 x 67 x 80 mm
Weight	650 g
Warranty	1 Year, brand new
